

INVITATION

Nordanstig's Trade Fair
Energy & environment

12 september 2009

A wise choice for our future

The future of the planet rests in our day-to-day existence!

The food we eat, the furniture we buy, the car we drive, the house we heat, the light we turn on and the clothes we wear have been produced with a greater or lesser effect on mankind and the environment.

THE CHOICES WE MAKE, MAKE A DIFFERENCE!

Think globally – buy locally!

The local authority, businesses and certainly you yourself have realized the importance of working to protect the environment. Many consumers want to buy environmentally-friendly and locally produced products. The idea of the Nordanstig's Trade Fair is to show what we can do locally, in order to contribute towards a positive change for the environment, and sustainable development.

The Trade Fair organisers want to present businesses and enterprises that intend to improve the environment of the future.

Do you think that a sustainable environment is important too? Do you want to join us? Apply for a place at the Trade Fair on the enclosed application form!

Place: Bergsjögården

Date: Saturday the 12th September 2009
